EXPERIENCE

Lead Developer --- Prep Network A U G U S T 2 0 1 8 - P R E S E N T

Prep Network is a high school focused sports media, event and recruiting company. We have over three thousand writer nationwide covering 6 different sports with the mission of giving exposure to high school athletes. We also host hundreds of events each year all over the country which allow players to be seen by recruiters. The third pillar of the company is RecruitMe which is LinkedIn for high school athlete.

- **RecruitMe**

Technologies: HTML5, LESS, ReactJS, Laravel, Google API, Stripe API

URL: <https://recruitme.prephoops.com>

This platform allows high school players to create profiles which consist of game footage, stats from their athletic career, academic information and more. Once a player has a profile, they are able to be discovered and matched with colleges that are looking to recruit players matching their profile (Think of this like Match.com and LinkedIn for high school sports recruiting).

- **Events Platform**

Technologies: HTML5, LESS, Laravel, Google API, Stripe API,

Prep Network's Event App is where admins can manage events, sales, game day check ins, admissions, communication, and also allowed for teams to manage rosters, uniforms, hotels and transportation. This app was built in Laravel and leverages several third party APIs.

- **Events Platform**

Technologies: HTML5, Scss, Laravel, Wordpress API, GraphQL API, Hubspot, Stripe API, Various industry specific APIs, Data scraping,

The Hub is an internal admin application that allows Prep Network employees to manages all aspects of the business as well as our thousands of writers to manage their content, compensation and various tools to make sure they all write using the same standards.

- **Ticketing App**

Technologies: React Native, Events API, JWT

The ticketing app is used at Prep Network events to check in pre sale attendees and allow for on-site credit card purchases.

Full-Stack Developer --- DoTopia A U G U S T 2 0 1 6 - A U G U S T 2 0 1 8

DoTopia is a charitable giving platform that allows companies to leverage the power of giving to engage employees, foster customer loyalty and support corporate values. DoTopia expands giving from a transactional event into an engaging activity that results in more people, giving more. When I first joined DoTopia, the system was 100% ASP.NET, entirely siloed for a single client and not responsive. There was no SEO and the UX was extremely difficult to navigate. I have since rebuilt the entire system from starting from a full redesign all the way to architecting the server.

1. **Design/UX**

Technologies: Photoshop, Sketch, Invision

2. **Frontend**

Technologies: Angular 1

3. **Backend**

Technologies: Laravel, Stripe API

4. **Admin**

Technologies: Laravel, Third Party APIs, SASS

Software Engineer --- Hungry MARCH 2015 - AUGUST 2016

Hungry is a SoHo based creative agency. We specialize in building web applications that serve as internal tools, startup ideas, and marketing tools for large brands. We specialize in using AngularJS for all frontend work, Laravel for backend, Nginx for the server, and occasionally Node for unique API situations and workflow needs.

1. TwoTrees NY

Technologies: HTML5, LESS, Angular, Laravel
URL: <http://www.twotreesny.com>

2. Sephora Events Site

Technologies: HTML5, LESS, Angular, NodeJS, Redis
URL: <http://www.sephoraevents.com> (No Longer Exists)

3. 300 Ashland Site

Technologies: HTML5, SASS, ReactJS, NodeJS
URL: <http://www.300ashland.com>

4. Hungry Site

Technologies: HTML5, LESS, AngularJS, Laravel
URL: <http://hungryinc.com>

Front End Developer --- Night Owl Interactive JUNE 2013 - MARCH 2015

Night Owl Interactive is an interactive agency that specializes in building PHP web apps. We work primarily with startups. Often times when non-technical co-founders have an idea for an online business, we will build it for them.
